

ABOUT THE AUTHORS

**Robert L. Brown**, F.S.A. 1976, F.C.I.A. 1977, and A.C.A.S. 1980, is Professor in the Department of Statistics and Actuarial Science and Director of the Institute of Insurance and Pension Research at the University of Waterloo, Ontario. He received an Hons. B.Math degree and an M.A. [gerontology] from the University of Waterloo. He has served as President of the Canadian Institute of Actuaries and is currently a member of the Board of Governors and Director of

Publications of the Society of Actuaries. He is the author of five books, including *Economic Security in an Aging Population* (Toronto, Ont.: Butterworths Canada, 1991) and *Introduction to the Mathematics of Demography*, 2nd edition (Winsted and Avon, Conn.: Actex Publications, 1993). He has published several papers in scientific and technical journals, including "Actuarial Aspects of the Changing Canadian Demographic Profile" (*TSA* Volume XXXIV, 1982), "Future of Group Insurance: Demographic Aspects" with Ben W. Lutek (*TSA* Volume XXXV, 1983), and "Toward Computerized Underwriting—A Biological Age Model" with K. S. Brown (*TSA* Volume XXXV, 1983).

**Jacques F. Carriere**, A.S.A. 1980, is Associate Professor of Actuarial Science at the University of Manitoba, where he teaches and directs the actuarial science program. Previously, he was an Assistant Professor at the University of Iowa. He received a Ph.D. in business—statistics after conducting research into total quality management at the University of Wisconsin, Madison. His current research interests include valuing of American options, estimation of the

term structure of interest rates, and catastrophe insurance futures. He is a Chartered Statistician and Fellow of the Royal Statistical Society. He currently serves on the Committee on Papers for the Society of Actuaries. Dr. Carriere has published papers in *Insurance: Mathematics and Economics*, *Statistics & Probability Letters*, and *The Journal of Mathematical Psychology*. His *Transactions* papers are "The Bounds of Bivariate Distributions That Limit the Value of Last-Survivor Annuities,"

with Lai K. Chan (Volume XXXVIII, 1986), and "Parametric Models for Life Tables" (Volume XLIV, 1992).

**Hans U. Gerber**, A.S.A. 1974, has been on the faculty of the Ecole des H.E.C. (Business School) of the University of Lausanne, Switzerland, since 1981; currently he is head of the Institute of Actuarial Science there. Previously he was on the faculty of the University of Michigan and the first Warren Professor of Actuarial Science at the University of Manitoba. Professor Gerber's research activities are in risk theory and applied probability. He is corresponding member of the Royal Society of Belgian Actuaries, honorary member of the Union Strasbourgeoise des Actuaires, and member of the board of the Swiss Association of Actuaries. He is one of the five authors of the Society of Actuaries text *Actuarial Mathematics* (1986). His monograph, "An Introduction to Mathematical Risk Theory," was published by the Huebner Foundation in 1980, and his text, *Life Insurance Mathematics*, was published by Springer and the Swiss Association of Actuaries in 1990. Dr. Gerber is coeditor of *Insurance: Mathematics and Economics* and of the *Journal of the Swiss Association of Actuaries*. His actuarial papers have been published in *ASTIN Bulletin*, *Insurance: Mathematics and Economics*, *Scandinavian Actuarial Journal*, the *Journal of the Swiss Association of Actuaries*, and the *Transactions* of the International Congresses. His *Transactions* papers are "Some Moment Inequalities and Their Applications" (Volume XXXVIII, 1986), "Probabilistic Model for (Life) Contingencies and a Delta-Free Approach to Contingency Reserves" (Volume XXVIII, 1976), and with Donald A. Jones: "Credibility Formulas of the Updating Type" (Volume XXVII, 1975), "Dividend Formulas in Group Insurance" (Volume XXVI, 1974), and "Practical Considerations in Connection with the Calculation of Stop-Loss Premiums" (Volume XXVIII, 1976).

**Lee Giesecke**, A.S.A. 1983, is an actuary at the U.S. Department of Defense, where he has worked since 1974. He received a bachelor of science degree in engineering and humanities from the Massachusetts Institute of Technology in 1961. He is a member of the Middle Atlantic Actuarial Club and the American Statistical Association. He has written three papers: "After-Tax Present Value in Divorce Pension Valuations" (*ARCH* 1990.2), "Piecewise Regression as a Measure of Smoothness in Whittaker Graduations" (*ARCH* 1984.2), and "Use of the Chi-Square Statistic to Set Whittaker-Henderson Smoothing Coefficients" (*1981 Proceedings of the Section on Survey Research Methods*).

**Bruce L. Jones**, F.S.A. 1988 and F.C.I.A. 1989, is Assistant Professor in the Department of Statistics and Actuarial Science at the University of Iowa. He received B.Math. and M.Math. degrees in actuarial science and a Ph.D. in statistics from the University of Waterloo, Ontario. He has worked at the Royal Insurance Company, the Canada Life Assurance Company, and the Mutual Life Assurance Company of Canada. He has served on the Society of Actuaries Health Benefit Systems Practice Education Committee, Health Benefit Systems Practice Research Committee, and Task Force on the Effect of Lifestyles on Health Care Costs and is consultant for the Course 161, "Mathematics of Demography," examination. He is also a member of the Education and Research Section Council and editor of *Expanding Horizons*, the Section newsletter.

**Michael Sherris**, A.S.A. 1987, is a senior lecturer in actuarial studies at Macquarie University, Sydney, Australia. Prior to joining the university in 1985, he was employed by the Reserve Bank of Australia, Commercial Banking Company of Sydney, Zurich Australia Life, and the State Bank of NSW as an actuary, mainly in pensions, corporate finance, investment funds management and money market areas. He received a B.A. with first class honors in actuarial studies from Macquarie University and an M.B.A. from the University

of Sydney and has studied doctoral finance and accounting at the Australian Graduate School of Management. He was the Molson visiting professor in financial economics and investment at the University of Waterloo. He is a Fellow of the Institute of Actuaries, a Fellow and current Council Member of the Institute of Actuaries of Australia, a member of IAA, ASTIN, and AFIR, and a member of the Institute for Quantitative Research in Finance (Q-Group) Australia. He is the author of *Money and Capital Markets: Pricing, Yields and Analysis* (Sydney: Allen & Urwin) and has published papers in *Scandinavian Actuarial Journal*, *Journal of the Institute of Actuaries*, *Transactions of the Institute of Actuaries of Australia*, *ARCH*, and *Journal of the Securities Institute of Australia*.

**Elias S.W. Shiu**, A.S.A. 1977, is Principal Financial Group Professor in Actuarial Science at the University of Iowa. Before joining the university, he was a professor of actuarial science at the University of Manitoba for 16 years. He obtained a B.Sc. (Hons) degree and an M.Sc. degree from the University of Manitoba and a Ph.D. degree from the California Institute of Technology. He is chairperson of the SOA Committee on Financial and Investment Management Specialty

Guides and a member of the Investment Section Council, Financial and Investment Management Practice Advancement Committee, and Research Paper Committee. He is an associate editor of *Insurance: Mathematics and Economics* and *Journal of Actuarial Practice*. In addition to more than 45 discussions, his publications in the *Transactions* include "Integer Functions and Life Contingencies" (Volume XXXIV, 1982), "Minimum- $R_2$  Moving-Weighted-Average Formulas" (Volume XXXVI, 1984), "Algorithms for Cash-Flow Matching" with R. Kocherlakota and E. S. Rosenbloom (Volume XL, 1988), "Arbitrage-Free Pricing of Interest-Rate Contingent Claims" with H.W. Pedersen and A. E. Thorlacius (Volume XLI, 1989), and "Cash-Flow Matching and Linear Programming Duality" with R. Kocherlakota and E. S. Rosenbloom (Volume XLII, 1990). Dr. Shiu has also published papers in *ASTIN Bulletin*, *Insurance: Mathematics and Economics*, and *Scandinavian Actuarial Journal*.

**Charles L. Trowbridge**, F.S.A. 1946, was employed by the Bankers Life Company (now Principal Mutual Life) immediately after receiving an M.A. degree from the University of Iowa. His work with this one insurer lasted for nearly 40 years, until his retirement as Senior Vice President and Chief Actuary in 1979. For 30 months in the early 1970s, he was Chief Actuary of the Social Security Administration. For four years in the early 1980s, he was Professor of Actuarial Science at the University of Michigan. Among his numerous SOA assignments, he was the original chairperson of the Committee on Continuing Education and later the first chairperson of the Committee on Valuation and Related Matters. He served on the Board of Governors for nine years, including a term as President in 1974–75. He also served a three-year term on the Board of Directors of the American Academy of Actuaries. Over the years, he has published about a dozen papers in the *Transactions*, but he has also written for the *Transactions of the International Congress of Actuaries*, the *Journal of Risk and Insurance*, the *CLU Journal*, *Contingencies*, the *Life Insurance Council Review*, the Employee Benefit Research Institute, and the *Harvard Business Review*. He is the co-author of one book published by the Society and two others published by the Pension Research Council. Since his retirement, he became the first chairperson of the Pension Section Council, served for three years as Editor of *The Actuary*, and authored a monograph, *Fundamental Concepts of Actuarial Science* (Actuarial Education and Research Foundation, 1989).
