E-COURSES: GROWING YOUR KNOWLEDGE

THE SOA IS PROUD to offer 20 e-courses worth more than a combined 80.00 continuing professional development (CPD) credits. E-course topics range from professionalism and communication to social insurance and enterprise risk management, and can be completed in as little as two hours. Whether you're changing fields, in need of some refreshers or looking to improve your communication skills, get the knowledge you desire by registering for an e-course today. See our full listing at www.soa.org/ecourses.

FUNDAMENTALS OF ACTUARIAL PRACTICE (FAP)

This e-course is set in the context of the control cycle. It encompasses real-world applications and uses examples to demonstrate actuarial principles and practices. You will also have opportunities to apply

these principles and techniques in traditional and nontraditional actuarial practice areas. With the fundamentals in your toolkit, you will be better prepared to apply your learning to new areas of practice that may emerge during the course of your actuarial career.

HEALTH FOUNDATIONS

The Health Foundations e-course discusses the health care system at a micro level. It begins with an exploration of health care terminology and coding. The module moves on to discuss sources of data with regard to medical treatments and claims experience. The next step is to learn about the administrative systems that bring the data sources together. The module ends with examples illustrating how these elements combine to help provide solutions to actuarial problems. **A**

Equity-Based Insurance Guarantees Conference

NOVEMBER 17–18, 2014

Renaissance Chicago Downtown Hotel
Chicago

This year's conference is focused on pressing issues encountered by writers of these risks in Australia and Asia (excluding Japan). Being the only event of its kind in this part of the world, we hope that you will be able to join us at this very specialized forum, where you can freely network with fellow professionals, exchange product-development-related ideas and discuss current issues facing you as practitioners, as they relate to the development of risk-measurement/risk-management/risk-monitoring ideas and tools.
