

**TRANSACTIONS OF SOCIETY OF ACTUARIES
1967 REPORTS**

**REPORTS OF THE COMMITTEE ON GROUP
LIFE AND HEALTH INSURANCE**

INTRODUCTION

THE report which follows was prepared by the Committee on Group Life and Health Insurance. This Committee was recently created as a result of the merging of two former committees—the Committee on Group Insurance Mortality and the Committee on Experience under Group Health Insurance. The Committee's report consists of four sections, as follows:

- I. Group Weekly Indemnity and Group Hospital and Surgical Expense Insurance
- II. Group Comprehensive Medical Expense Benefits Insurance
- III. Group Supplementary Major Medical Expense Benefits Insurance
- IV. Group Long-Term Disability Insurance

Sections III and IV are being published for the first time. Section III, Group Supplementary Major Medical Expense Benefits Insurance, has been under study for many years and is now being published in conjunction with a paper entitled "Expected Claim Costs for Supplementary Major Medical Expense Benefits," by Pettengill and Mahder. This paper, which describes the development of the Supplementary Major Medical Tabular, is to be presented in the spring of 1968. Section IV, Group Long-Term Disability Insurance, is a brief report of some of the data submitted on this coverage. In Section II, Group Comprehensive Medical Expense Benefits Insurance, it should be noted that the basis of tabular claims has been updated and the new tabular is set forth in Appendix I of that section.
