

**TRANSACTIONS OF SOCIETY OF ACTUARIES
1975 REPORTS**

I. GROUP LIFE INSURANCE MORTALITY

THIS report adds the experience by number of lives for calendar years 1970-74 under group life insurance policies to that previously reported in the 1971 report of the Committee, with some significant changes. In July, 1972, the Committee altered the format of the contribution to include information by sex and to allow for the addition of groups and disability provisions which had previously been excluded from the study. Not all companies were able to compile their contributions on the revised or new-format basis for all years. As a result a sizable amount of experience was contributed on the former or old-format basis for the years 1970-72.

Old-format experience is limited to policies with at least twenty-five lives at issue and excludes trusteeship, association, and union cases. Data under the old format are included only with respect to policies containing one of the three common disability provisions described briefly below:

1. Waiver of Premium Disability. This clause, in general, provides for waiver of premium upon receipt of proof of total disability of at least nine months' duration occurring before age 60. Proof of continued total disability is required annually thereafter.
2. Extended Death Benefit. This clause, in general, provides for payment of the full face amount upon death occurring within one year after termination of employment and prior to age 65 (or 60) if the employee was disabled at the time of termination of employment and continued disabled until death.
3. Total and Permanent Disability. This clause provides, upon an employee's disability prior to age 60, for payment of the face amount of insurance, in some instances in one sum, in others in installments over a short period, usually sixty months.

New-format experience includes groups of at least ten lives at issue and also includes trusteeship, association, and union cases. There are four categories of disability provisions studied under the new format as follows:

1. Waiver of Premium Disability (Age 60 and Age 65). Age 60 Waiver of Premium is identical with the Waiver of Premium provision under the old format. This category also includes Waiver of Premium policies covering disabilities occurring prior to age 65.
2. Extended Death Benefit and No Disability. In addition to the Extended Death Benefit provision, which is described above for the old-format experience, this category also includes policies with no disability provision.

3. Total and Permanent Disability. This disability provision is the same as that described for the old format.
4. Mixed and Other Disability. This category includes all policies for which more than one of the provisions described above apply to different classes of employees of a group, or which contain any other provision for continuance of coverage or cash benefits in the event of disability.

Data coded on the basis of the old and new formats are shown in Table 1A. Tables 1B, 2, 3, 4A, 4B, and 5 include data coded on the basis of the new format only. Experience on the Mixed and Other Disability provisions is included only in Table 1B.

In the case of Waiver of Premium (Age 60 and Age 65), the actual disability claims shown represent three-fourths of the reported claims. All other disability claims are counted as 100 per cent of approved claims. For the Mixed and Other Disability category, this practice results in an overstatement of claims, as the portion which constitutes Waiver of Premium in this group is unknown and cannot be adjusted.

In viewing the separate death and disability experience, it should be kept in mind that the experience is influenced by employer and insurance company practices in permitting the continuance of insurance on disabled lives, and that, accordingly, for some purposes the combined death and disability experience may be more significant. In addition, Waiver of Premium disability claims have been known to be underreported in the past. During the time period covered by this report some companies have instituted corrective actions to reduce the number of unreported claims. Disability claims for some years, therefore, may have increased as a result of improved reporting of claims and the inclusion of unreported claims from prior years. The experience under the Total and Permanent Disability clause should be interpreted cautiously, since companies generally have not offered these benefits in many years.

Tables 2, 3, and 4B also provide data by sex. Cases for which experience by sex was not available were coded as "sex unknown" and are presented as a separate group.

This report uses the Standard Industrial Classification (SIC) code format as published in the United States Bureau of the Budget *Standard Industrial Classification Manual* (revised 1967).

Table 1A presents data for each disability provision (except for Mixed and Other Disability) by calendar year from 1965 through 1974. Mortality ratios are given on the basis of the Commissioners 1960 Standard Group Mortality Table (1960 CSG) and the 1960 Basic Group Mortality Table. The data for the years 1965-69 were taken from the 1971 report and are on the old-format basis. Data for the years 1970-72 include both old- and

new-format experience, while all data for calendar years 1973 and 1974 are coded on the basis of the new format. Table A indicates how the data were split between the old and new formats and how new-format experience was divided by sex category for the years 1970-74. Table 1A should be interpreted with caution, since the trend of mortality ratios may be affected by the addition to the experience, beginning in 1970, of new disability provisions and types of groups. The effect which the previously excluded groups had on the overall new-format experience may be seen in Table B. The presentation of data in Table 1B is similar to that in

TABLE A

* All disabilities and ages combined.

† 75 per cent of disability claims on Waiver of Premium.

Table 1A, but only experience submitted on the basis of the new format is included. As in Table 1A, mortality ratios are given on the basis of the 1960 CSG and the 1960 Basic Group tables. Ratios are also given on the basis of the 1970-74 new-format experience, using the rates shown in Table 3 by sex and disability category. Different trend patterns between mortality ratios based on the two 1960 mortality tables and ratios based on the 1970-74 tabular rates may be the result of changes in the mix of exposure by sex, since the 1960 CSG and 1960 Basic Group tables do not differentiate by sex whereas the 1970-74 tabular does make such a distinction.

In Table 2, the aggregate data for the years 1970-74 appear by sex for the first three disability categories studied under the new format, tabulated by quinquennial age groups. The assignment of age groups on the new-format basis was changed so that the central age for each group is now one year less than that used for the previous report. Central age 17

* 75 per cent of disability claims on Waiver of Premium.

† Actual/Tabular in per cent.

represents the age group 0-19, and central age 89 represents the age group 85 and over. Female mortality is approximately 50 per cent of male mortality under the Waiver of Premium and the Extended Death Benefit and No Disability experience and is a somewhat higher proportion of male mortality under policies with the Total and Permanent Disability provision. In the sex-unknown category, mortality ratios almost always fall between the male and female ratios. The low ratios for the Extended Death Benefit and No Disability experience in the sex-unknown category are due to the fact that a substantial portion of this group is female. In fact, over half the total experience in this disability category consists of one large case which is almost 50 per cent female (exposures, but not claims, were available by sex for this case).

Because several companies had difficulties in compiling their contributions, not every company is represented at each central age. Therefore, Table 2 probably is not useful at all ages for age distribution purposes. Data were eliminated at age 17 for one company, at ages 82 and 89 for a second company, and at ages 67-89 under the Extended Death Benefit and No Disability category for a third company.

The data from Table 2 were used to compute disability rates, accidental death rates, and total death rates by quinquennial age group as shown in Table 3. The disability rate at age 62 for Waiver of Premium experience was computed by dividing disability claims by the exposures for Age 65 Waiver of Premium cases only. The determination of accident as a cause of death under group life policies may be less than exact, and caution should be used in applying accidental death rates to forms of insurance other than group life. It should also be noted that one contributing company included dismemberment claims with its accidental death claims; however, the distortion was so slight as to have a negligible effect on the accidental death rates in Table 3.

In some cases, disability rates are substantially higher at age 57 than the 1965-69 age 58 rates in Table 3. This may be partly the result of the processing practice of assigning disability claims for ages 60 and above to the age group 55-59 for Age 60 Waiver of Premium and Total and Permanent Disability experience. This practice may have had less of an effect in the 1971 study because of the higher central ages. In addition, as previously mentioned, the disability claims for Waiver of Premium may have increased as a result of improved reporting of claims. Disability rates at age 62 for Waiver of Premium may be overstated because of difficulties which certain companies experienced in coding their data.

Table 4A presents experience for (a) all industries on a two-digit SIC basis and (b) those SIC industries at the three-digit level which have

* Tabular claims by Table 3 by sex; actual/tabular in per cent.

more than 100,000 life years exposed. Table 4B shows experience on a two-digit level by industry and sex. Tabular claims were obtained for both tables by applying the rates of Table 3 (experience of 1970-74) by sex category to the exposed to risk by industry code for each quinquennial age group. Actual-to-tabular ratios are, therefore, measured against an industries standard of 100 per cent. Because of the effect of rounding Waiver of Premium disability claims, subtotals and grand totals in the columns "All Claims" and "Disability" are not always equal to the sums of their respective components. Industry codes in Tables 4A and 4B may not represent completely the 1967 *SIC Manual*, since there was a revision of the *Manual* in 1972 which included substantial changes in government classifications. An unknown portion of the data submitted was coded on the 1972 basis. Wherever possible, a conversion to the 1967 basis was made. Industries known to be coded on the 1972 basis which did not have a corresponding 1967 code were placed in the nonclassifiable category, coded 999.

Table 5 is a dispersion table of actual-to-tabular ratios by size of experience unit. Tabular rates were taken from Table 3 by sex category. The data should be interpreted with some caution, since companies varied in their definition of an experience unit. Table 5 indicates that small groups of less than twenty-five lives displayed a slightly higher actual-to-tabular ratio than that of average-size groups. Groups of 1,000 or more lives also showed somewhat less favorable experience. As an interesting actuarial footnote, an analysis for reasonableness of the data in Table 5 revealed one case of 6,050 lives which in one year had an actual-to-tabular ratio of 3.8 per cent, with one actual claim.

The following companies contributed experience for the total period or a portion of the period of this study:

Aetna Life Insurance Company
Bankers Life Company
Connecticut General Life Insurance Company
Continental Assurance Company
Equitable Life Assurance Society of the United States
John Hancock Mutual Life Insurance Company
Lincoln National Life Insurance Company
New York Life Insurance Company
Occidental Life Insurance Company of California
Prudential Insurance Company of America
Sun Life Assurance Company of Canada
