

INDEX.SOA.92-93

FOREWORD

This *Index* covers all Society of Actuaries material published in 1992 and 1993. The intent is to publish cumulative volumes until a maximum size is reached, probably every three years. The last cumulative volume was the *Index to 1989-91 Publications of the Society of Actuaries*, which covered all publications of the Society in 1989, 1990, and 1991.

This *Index* includes the Society's serial publications: *The Actuary*, *ARCH*, *Transactions*, *Record*, *Reports of Mortality, Morbidity and Other Experience*, and *The Future Actuary*. It also includes Section Newsletters, Study Notes, Proceedings, *Professional Actuarial Specialty Guides*, and references to material developed through Society-sponsored research projects. This material is available through the Books Department or the Research Department of the Society office.

The *Index* comprises three sections: Title, Subject, and Author. All the papers, discussions, articles, letters to the editor, and other material are categorized separately in each of these sections.

Recognition and thanks are due to the following actuaries and editors who indexed individual publications:

SERIALS

<i>The Actuary</i>	Cecilia Green
