

**ACTUARIAL RESEARCH CLEARING HOUSE
1985 VOL. 2**

1985.2

CONTENTS

Editor's Comments	v
Conference Program	vii
List of Attendees	xi
Alphabetical List of Contributors	xvii
Abstracts	xix
Parametric Empirical Bayes and Credibility Theory Carl N. Morris	1
Robust Poisson Rate Estimates via Sculptured Normal Superpopulations: A Summary Donald P. Gaver	5
Accurate Approximations for Posterior Moments and Margins Luke Tierney and Joseph B. Kadane	17
Bayesian Analysis Using Monte Carlo Integration with an Example of the Analysis of Survival Data Leland Stewart	77
Automating Probabilistic Inference Ross D. Shachter	91
Bayesian Predictions: Non Parametric Methods and Least-Squares Approximations M. Mouchart and L. Simar	127
Bayesian Reliability Estimation of a Two Parameter Cauchy Distribution H. A. Howlader and G. Weiss	145
Robust Bayesian Analysis with Applications in Reliability L. Mark Berliner	157

Examples of Parametric Empirical Bayes Methods for the Estimation of Failure Processes for Repairable Systems	179
Asit P. Basu and Steven E. Rigdon	
Tolerance Intervals in Risk Theory	197
Wolf-Rüdiger Heilmann	
Robust Credibility	209
Stuart Klugman	
Bayesian Inference About the Tail of a Distribution	221
Bruce M. Hill	
A Method for Constructing a Unimodal Inferential or Prior Distribution	239
Patrick L. Brockett, Abraham Charnes and Kwang Hun Paick	
Credibility and Fundamental Risk	253
Thomas N. Herzog	
Structured Credibility in Applications - Hierarchical, Multidimensional, and Multivariate Models	267
Gary Venter	
Comparing Probability Forecasters: Basic Binary Concepts and Multivariate Extensions	309
Morris H. DeGroot and Stephen E. Fienberg	
Combination of Estimates of Outstanding Claims in Non-Life Insurance	335
G. C. Taylor	
An Analysis of Experience Rating	373
Glen Myers	
Experience Rating Automobile Drivers	425
William DuMouchel	
Using Model-Based Smoothing and Empirical Bayes Estimation Techniques to Predict Automobile Accident Frequencies for California Drivers in a Two-Way Classification	435
Thomas J. Tomberlin	
Assumptions in Pension Plan Valuations	481
Arnold F. Shapiro
