

ERRATA

The paper "Six Bridges to  $\psi$ 's was presented at the Actuarial Research Conference at the University of Iowa in 1992 and printed in ARCH 1993.1. Two corrections need to be made to that paper:

- (1) On pages 156, 158 and 161 (Monte Carlo Bridges #1, #2 and #3, respectively) each probability statement of the form "at least k% of the time we can expect  $\psi(u)$  to lie in the interval (a,b)" should be recast to read "[a,b] is a k% confidence interval for  $\psi(u)$ ."
- (2) The formulas shown for the upper bounds  $\psi(u)$  on pages 156 and 158 (Monte Carlo Bridges #1 and #2, respectively) are questionable, so should be treated as higher estimates rather than upper bounds.

In ARCH 1993.3, the title of the paper appearing on page 449, authored by L. Timothy Giles, was incorrectly listed in the Contents. The correct title of the paper is "The Practical Use of Recursive Functions." We apologize for any inconvenience this error may have caused.
