

**TWENTY-NINTH ACTUARIAL RESEARCH CONFERENCE**

Each year, an Actuarial Research Conference is held to provide a central meeting for academics and researchers interested in all aspects of actuarial science. The 29th Actuarial Research Conference will be held at Oregon State University, Corvallis, Oregon from Thursday, August 25 through Saturday, August 27, 1994.

As in recent years, participants are invited to present papers on all topics of interest to actuaries. We hope to have a lead paper on market value based accounting for insurers followed by discussion on this and related topics.
