# Summary of 2003 IRC, PBGC, Federallncome Tax, SocialSecurity and Medicare Amounts 

by Heidi Rackley

## Summary

This article summarizes 2003 cost-of-living adjustments related to employee benefit plans, including: (i) Internal Revenue Code (IRC) limits applicable to qualified retirement plans, transportation fringe benefits, adoption assistance programs, medical savings accounts and long-term care plans, (ii) PBGC guaranteed benefits, (iii) federal income tax factors, (iv) Social Security and Supplemental Security Income, (v) Medicare and (vi) covered compensation.

## IRC qualified <br> retirement plan limits

Recent low inflation-the increase in third quarter CPI-U from 2001 to 2002 was only 1.6 percent-combined with the IRC's rounding rules (limits are rounded down to multiples of $\$ 50, \$ 500$ or $\$ 5,000$ ) kept most 2003 qualified plan limits at their 2002 values. The exceptions arelimits set to increaseby the E conomic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA). EGTRRA changed many retirement plan dollar limitsfor 2002, added others and changed the future indexing rules for many limits. (Unless extended by future legislation, the EGTRRA changes will sunset after 2010.) The J ob Creation and Worker AssistanceAct of 2002 further changed the 409(o)(1)(C) tax-credit ESOP distribution period limits and 408(k)(2)(C)

SEP minimum compensation limit. The table on page 4 shows the rounded and unrounded 2003 limits (IRS published the rounded limits in Notice 2002-71) and the prior three year's limits.

## Other employee-benefit-related IRC limits

Qualified transportation fringe benefit limits, qualified adoption assistance program limits and medical savings account (MSA) limits for 2003 reflect the 1.6 percent increase in the averageCPI-U for the 12 months ending August 31 and are rounded to multiples of $\$ 5, \$ 10$ or $\$ 50$. (The Transportation Equity Act for the 21st Century amended IRC Section 132(f), qualified transportation fringe benefit limits, and EGTRRA amended IRC Section 137, qualified adoption assistance program limits, both effectivefor tax years beginning after 2001.) Qualified long-term care premium and per diem limits reflect the 4.7 percent increase in the medical care component of CPI-U from August 2001 to August 2002 and are rounded to the nearest multiple of $\$ 10$. The table on page5showstherounded 2003limits, published by IRS in Rev. Proc. 2002-70 and the prior four year's limits.

## PBGC guaranteed benefits

The maximum PBGC guaranteed monthly benefit is adjusted annually on the basis of changes in the Social Security "old law" contribution and benefit base. For a single-employer defined benefit plan terminating in 2003, themaximumguaranteed benefit will be $\$ 3,664.77$ per month - a 2.4 percent increaseover the 2002 limit of $\$ 3,579.55$. This amount is adjusted ifbenefit paymentsstart beforeage 65 or if benefits arepaid in a form other than a single-lifeannuity. Some of the guaranteed amount may be paid from the plan's assets, and participants may receive more if the plan is better funded or the PBGC can recover other amounts from the plan sponsor.

## Federal income tax -phase-in of EGTRRA changes

EGTRRA reduced marginal tax rates across the board and created a new 10 percent tax bracket, carved out of thelower portion of the 15 percent tax bracket. EGTRRA tax provisions will be phased in over several years, including gradual reduction and ultimate repeal of the estate tax (starting in 2002) and the limits on itemized deductions and personal exemptions (beginning in 2006). M arriage penalty relief begins in 2005. The table on page 6 summarizes the effective dates of key EGTRRA changes. Unless extended by future legislation, the EGTRRA changes will sunset after 2010.

Personal exemptions are currently phased out for taxpayers whose adjusted gross incomes exceed specified amounts (which vary by tax filing status). For 2003 these "threshold amounts" at which phase-out begins and ends are shown below. E GTRRA reduces the phase-out of personal exemptions beginning in 2006 and eliminates thephase-out in 2010.

Total itemized deductions for 2003 are reduced by 3 percent of a taxpayer's adjusted gross income in excess of \$139,500 (\$69,750 for married, filing separately), an increase from \$137,300 in 2002 (\$68,650 for married, filing separately). EGTRRA phases out this reduction initemized deductionsbeginningin

EITC. EGTRRA marriage penalty relief increases the threshold phase-out amount for joint return filers by $\$ 1,000$ in 2002 2004, by $\$ 2,000$ in $2005-2007$ and by $\$ 3,000$ after 2007.

## Social Security and Supplemental Security Income (SSI) amounts

Social Security benefits payable J anuary 1, 2003, will increase 1.4 percent-theincrease in CPI-W from the third quarter of 2001 tothe third quarter of 2002. The average monthly Social Security benefits before and after the 1.4 Social Security and Supplemental Security Income(SSI) amounts

2006 and eliminates the reduction in 2010. Certain taxpayers are entitled to a refundableearned incometax credit (EITC) equal to the maximum credit amount reduced by the phase-out amount. The earned income amount is the amount of earned income at or above which the maximum amount of the earned income credit is allowed. The phaseout amount equals the product of the phaseout percentage (based on the number of qualifying children) multiplied by theexcess, if any, of thetaxpayer's adjusted gross income or earned income, whichever is greater, over the threshold phase-out amount. For tax years beginning after 2001, only taxable earned income (excluding salary reduction contributions under 401(k) plans, cafeteria plans and health or dependent careFSAs) is taken into account when calculating the

## Covered compensation

Covered compensation - the averageOASDI contribution and benefit base for the 35-year period ending with the year the employee attains Social Security retirement age-determines permitted and imputed disparity limits for qualified retirement plans. In lieu of using the actual covered compensation amount, qualified plans may determine permitted or imputed disparity using a rounded covered compensation table published annually by IRS. The 2003 table on page 12, published in Rev. Rul. 2002-63, rounds values to the nearest $\$ 3,000$. \&

In lieu of using the actual covered compensation amount, qualified plans may determine permitted orimputed disparity using a rounded covered compensation table published a nnually by IRS.
