# List of Tables

Table	Page
1 Summary of Assessment Models Tested .....	18
2 Description of Variables in Study Database .....	19
3 Summary of Data Used in Study .....	23
4 Example of Assignment of Individuals to Risk Groups .....	24
5 Example of Prediction of Expenditures for Individuals under Different Risk Assessment Methods— Retrospective Application.....	25
6 Age and Gender Distribution of Enrollees by Plan Type, 1992 .....	28
7 Regional Distribution of Enrollees by Plan Type, 1992 .....	28
8 Total Expenditure Distribution by Plan Type, 1992 .....	29
9 Frequency Distribution of Expenditures by Plan Type, 1992 .....	29
10 Average Expenditure by Service Group, by Plan Type (Total Expenditures Truncated at \$25,000), 1992.....	30
11 Summary of Predictive Accuracy for Individual Results, Retrospective and Prospective Analysis of All Pools.....	30
12 Adjusted R <sup>2</sup> for Selected Pools, by Method, Individual Level Analyses .....	33
13 Summary of Predictive Accuracy—Group Results, Retrospective and Prospective Analysis of All Pools.....	35
14 Mean Absolute Percentage Error for Selected Pools, by Method, Group Level Analysis .....	35
15 Predictive Accuracy for Three Pools at Different Truncation Levels .....	40
16 Sensitivity Analysis of Predictive Accuracy for Three Pools for ACG and ADG Models, with and without Inpatient Diagnoses, 1992.....	40
17 Total Expenditures for Leavers, Joiners, and Stayers.....	40
18 Ratio of Predicted to Actual Expenditures for Leavers, Joiners, and Stayers by Risk Assessment Method, Retrospective Models.....	41
19 Comparison of Risk Weights across Selected Pools: Age and Sex Model (Weights Standardized to Adjusted Mean Expenditure for Pool).....	43
20 Comparison of Risk Weights across Selected Pools: ACG Model (Weights Standardized to Adjusted Mean Expenditure for Pool).....	44

# List of Tables—Continued

Table	Page
21 Comparison of Risk Weights across Selected Pools: EDCG Model .....	46
22 Comparison of Predictive Accuracy of Risk Assessment Methods .....	47
23 Statistical Summary of Total Annual Health Expenditures for High-Cost Conditions Identified for Study, Data Used for Identifying Conditions—Individuals with One Inpatient Admission for the Year .....	56
24 Frequency of Identified High-Cost Conditions and the Percentage of Total Individual Health Care Expenditures over \$25,000 They Represent as Computed from Sample of Data—Seven Pools—Used to Estimate Predictive Accuracy of High-Cost Condition and Comparison Models (Conditions Sorted by Average Annual Total Expenditures) .....	61
25 Analysis of High-Cost Conditions Summary of Predictive Accuracy—Individual Results, Retrospective (1992) Analysis Using Data from Seven Pools, No Truncation of Expenditures .....	62
26 Analysis of High-Cost Conditions Summary of Predictive Accuracy—Group Results, Retrospective (1992) Analysis Using Data from Seven Pools, No Truncation of Expenditures .....	63
27 Simulation of Risk-Adjustment Transfer Process Using Different Risk Assessment Methods: Example of Calculation of Transfer Amounts Using Age-Sex Method.....	66
28 Simulation of Risk-Adjustment Transfer Process Using Different Risk Assessment Methods: Projected Transfers across Pools, by Method .....	67
29 ADGs Used in the Analysis.....	68
30 Percentage of Enrollees with EDCGs.....	68
31 Comparison of Predictive Accuracy of Risk Assessment Methods .....	78
32 Comparison of Risk Assessment Model—General Considerations.....	78
B-1 Age and Sex Method Distribution (28 groups).....	94
B-2 ACG Method Distribution .....	94
B-3 ADG Method Distribution .....	95
B-4 DCG Method Distribution .....	95
B-5 CDXG Method Distribution.....	96
B-6 ICD-9 Codes Used in Constructing Nonrandom Groups .....	96
B-7 Assumptions Used for Imputation of Nonclaimants for Selected Pools.....	96

---

# List of Tables—*Continued*

C-1	Age and Gender Distribution of Enrollees by Pool and Year .....	99
C-2	Summary and Distribution of Total Expenditures by Pool and Year .....	100
C-3	Frequency of Total Expenditure Groups by Percentage .....	101
C-4	Average Expenditure by Service Group and Service Group's Percentage of Total Expenditures (Total Expenditure Truncated at \$25,000).....	102
C-5	Distribution by Region by Pool and Year .....	103
C-6	Summary of Predictive Accuracy—Individual Results, Retrospective Analysis (Split Half) 1991 .....	104
C-7	Summary of Predictive Accuracy—Individual Results, Retrospective Analysis (Split Half) 1992 .....	106
C-8	Summary of Predictive Accuracy—Individual Results, Prospective Analysis (Split Half).....	109
C-9	Summary of Predictive Accuracy—Group Results, Retrospective Analysis (Split Half) 1991 .....	110
C-10	Summary of Predictive Accuracy—Group Results, Retrospective Analysis (Split Half) 1992 .....	112
C-11	Summary of Predictive Accuracy—Group Results, Prospective Analysis (Split Half) .....	115
C-12	Percentage of Absolute Errors Greater than \$5,000 for All Pools and Methods, Individual Level Analysis .....	116
C-12A	Adjusted R <sup>2</sup> for All Pools and Methods, Individual Level Analysis .....	117
C-13	Percentage of Absolute Errors within \$500 for All Pools and Methods, Individual Level Analysis .....	118
C-13A	Mean Absolute Percentage Error for All Pools and Methods, Group Level Analysis .....	119
C-14	Summary of Predictive Accuracy with Three Levels of Truncation, Individual Results, Retrospective Analysis, 1992 .....	120
C-15	Summary of Predictive Accuracy with Three Levels of Truncation, Individual Results, Prospective Analysis .....	122
C-16	Summary of Predictive Accuracy for Three Levels of Truncation, Group Results, Retrospective Analysis, 1992 .....	124
C-17	Summary of Predictive Accuracy for Three Levels of Truncation, Group Results, Prospective Analysis ...	126
