

# EDUCATION COMMITTEE OF THE SOCIETY OF ACTUARIES (SOA)

## INTRODUCTORY STUDY NOTE

**EXAM SESSION:** SPRING 2023

**EXAM:** GENERAL INSURANCE - RATEMAKING AND RESERVING

**DATE:** Wednesday, May 10, 2023; Time scheduled with Prometric Test Center

1. The examination will consist of three and a half hours of written-answer questions worth 70 points.
2. The following link shows a [recommended FSA module/exam sequence for each track](#).

This order is NOT mandated. Each candidate will determine the appropriate sequence based on factors including readiness to sit for an exam, exam administration schedules, or study time available. However, the Education committees believe that these recommendations provide the most effective guide for candidate success. An examination/module may assume familiarity with material that is covered in any requirement that is recommended to come before that examination or module.

3. The syllabus material includes textbooks, online readings, and the study notes listed in the Appendix. The Appendix also may contain additional important information regarding this exam. A complete listing of the Syllabus and Learning Objectives is located in this exam's home page on the SOA Web site.
4. Several [book distributors](#) carry some or all of the textbooks for the Society of Actuaries exams.
5. Any changes in the syllabus for this exam will be published under "Updates" in this exam's home page on the SOA Web site.
6. [Past exams, solutions and case studies](#) are available on the SOA Web site.
7. There is no case study for this examination.
8. The candidate should be very familiar with the Learning Objectives. These Learning Objectives are the first ingredient in developing the syllabus and also guide the examination committee when writing questions. The Learning Objectives set out the cognitive level needed to pass this exam. You will notice that the candidates are expected to "analyze," "explain," "calculate," "describe," "apply," etc. While studying the syllabus material, candidates may want to refer back to the Learning Objectives to remain focused on the goals of the exam.
9. The examination questions for this exam will be based on the required readings for this exam. If a conflict exists (in definitions, terminology, etc.) between the readings for this exam and the readings for other exams, the questions should be answered on the basis of the readings for this exam.
10. Candidates may ONLY use these battery or solar-powered Texas Instruments models: BA-35, BA II Plus\*, BAII Plus Professional\*, TI-30Xa, TI-30X II\* (IIS solar or IIB battery), and TI-30X MultiView\* (XS solar or XB battery). Candidates may use more than one of the approved calculators during the examination.

Calculator instructions may not be brought into the exam room. During the exam, the calculator must be removed from its carrying case so the supervisor can confirm that it is an approved model. Candidates using a calculator other than the approved models will have their exams disqualified.

Candidates can purchase calculators directly from: [Texas Instruments](#), Attn: Order Entry, PO Box 650311, Mail Station 3962, Dallas, TX 75265, phone 800/842-2737.

*\*The memory of the **BA II Plus**, **BAll Plus Professional**, **TI-30X II**, and **TI-30X MultiView** calculators will need to be cleared by the examination supervisor upon the candidate's entrance to the examination room.*

11. A list of various [seminars/workshops](#) and [study manuals](#) appears on the SOA Web site. These seminars/workshops and study manuals do not reflect any official interpretation, opinion, or endorsement of the Society of Actuaries or its Education Committee.

Please note that the Education Committee expects candidates to read the material cited in the syllabus and to use other material as a complement to the primary sources rather than a substitution for them.

12. The Society of Actuaries provides study notes to persons preparing for this examination. They are intended to acquaint candidates with some of the theoretical and practical considerations involved in the various subjects. While varying opinions are presented where appropriate, limits on the length of the material and other considerations sometimes prevent the inclusion of all possible opinions. These study notes do not, however, represent any official opinion, interpretation or endorsement of the Society of Actuaries. The Society is grateful to the authors for their contributions in preparing study notes.

The American Academy of Actuaries, the Canadian Institute of Actuaries, the Conference of Consulting Actuaries, and the Society of Actuaries jointly sponsor various examinations administered by the Society of Actuaries.

## APPENDIX

There are no study notes for this examination.

The syllabus material includes two sources. The two sources are:

Friedland, J., *Fundamentals of General Insurance Actuarial Analysis*, Second Edition, 2022, Society of Actuaries.

*Actuarial Standards of Practice*, Actuarial Standards Board of the American Academy of Actuaries, [No. 25, Credibility Procedures](#), 2013

The SOA has reduced exam time by two hours for all FSA tracks beginning with the 2023 administration of exams. The GI track accomplished this by decreasing the two five-hour exams by one and a half hours each and increasing the two-hour exam by one hour. As such, there are major changes to the GI RR exam syllabus resources for Spring 2023 from Fall 2022.

The following resources have been removed from the GI RR exam syllabus:

- Friedland text:
  - Chapter 10 – A Reinsurance Primer
  - Chapter 25 – Premium Liabilities
  - Chapter 33 – Basic GI Risk Classification
  - Chapter 34 – Actuarial Pricing for Deductibles and Increased Limits
  - Chapter 35 – Claims-Made Ratemaking
  - Chapter 36 – Individual Risk Rating and Funding Allocation for Self-Insurers
  - Chapter 37 – Monitoring Results
  - Appendix G – Development Analysis for Excess Limits and Layers
- *Uses of Catastrophe Model Output*, American Academy of Actuaries, July 2018
