

Directory of Approved VEE Courses/Experiences

Using the Directory:

1. Scroll down to look for your course(s) alphabetically by school name
2. For each school courses are shown under one of the three VEE topics (Applied Statistics, Corporate Finance or Economics).
3. A combination of courses may be required for a specific VEE topic. If more than one course is listed on a single line, all courses on that line are required for that VEE topic requirement.

Please note: The courses shown on a particular line are the only courses needed to attain VEE credit for a topic (unless otherwise noted). For example if your school has several lines of courses listed as approved for Corporate Finance, you will only need the courses shown on one line, not all the school's approved Corporate Finance courses.

Approval dates:

Check the start and end dates of the approved courses. If you took an approved course during the approved time frame, and received a B- or better (or another approved score noted in the directory), you will be able to use the course for VEE credit.

Approval codes:

Make a note of the approval code listed for your approved VEE courses. This code will be needed to complete the Application for Validation by Educational Experience Credit.

Course Combinations:

Candidates may combine two approved courses/experiences to complete a VEE topic requirement. For example, an approved microeconomics course from a university may be combined with an approved macroeconomics course from another school or online provider. Likewise, an approved regression course may be combined with an approved time series course from two different providers. In these cases candidates should include approval codes from both approved courses on their VEE Candidate Credit application form. (Corporate finance courses must be completed in the combinations shown in the directory. No alternate combinations will be accepted without an additional course approval application process.)
