

AFTRA Retirement Plan Stats for 2016

The AFTRA Retirement Plan has provided pension benefits for actors since 1955. Benefits for each year of service are based on a percentage of compensation, up to the maximum allowed to be recognized for pension benefits under federal law.¹ The plan considers age 65 to be standard retirement age, but participants may begin receiving retirement benefits as early as age 55 with reductions to reflect that they will probably receive benefits for a longer time.

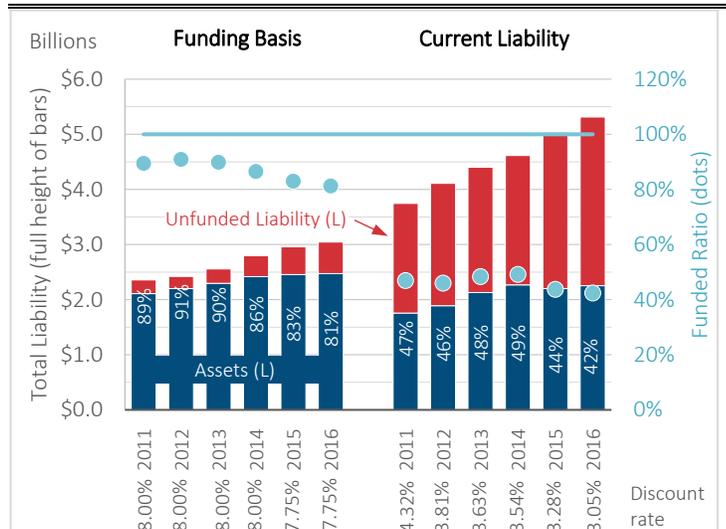

Pension Plan Stats²

As of Dec. 1, 2016

Active participants	23,733
Retirees receiving pension benefits	11,172
Inactive participants ³	15,943
Total participants	50,848
Average approximate annual pension benefit	\$16,000
Total pension benefits paid for 2016	\$176 million
Contributions for 2016	\$123 million
Assets for minimum required funding ⁴	\$2.5 billion
Liability for minimum required funding	\$3.0 billion
Unfunded liability for minimum funding	\$0.5 billion
Funded ratio (based on unrounded values)	81%
Market value of assets	\$2.3 billion
Current Liability ⁵	\$5.3 billion
Unfunded Current Liability	\$3.0 billion
Funded ratio (based on unrounded values)	42%

Plan Funded Status

2011–2016

About Pension Finances

For funding purposes, the discount rate used to compute liabilities represents the long-term expected return on assets; this plan uses 7.75%. In addition, assets may be smoothed. For funding purposes, the plan is 81% funded for 2016.

The discount rate for calculating Current Liability must be based on a 4-year average of 30-year Treasury securities; this plan's rate is 3.05% for 2016. Against the market value of assets, the plan's Current Liability is 43% funded for 2016.

For more Society of Actuaries' research on pension plans and retirement issues in general: <https://www.soa.org/research/topics/pension-res-report-list/>

¹ Internal Revenue Code §401(a)(17) limits compensation that may be used to calculate pension benefits. The limit is \$265,000 for 2016, increasing to \$270,000 for 2017 and \$275,000 for 2018.

² Based on publicly available Department of Labor Forms 5500 with accompanying schedules. Some figures may not add because of rounding.

³ Former active participants who have not yet started to receive pension benefits.

⁴ As reported by the plan's actuary on the plan's Form 5500 Schedule MB. Internal Revenue Code §§431–432 and accompanying regulations define minimum funding requirements for multiemployer pension plans.

⁵ Current Liability for multiemployer pension plans is defined by Internal Revenue Code §431(c)(6).

About the Society of Actuaries

The Society of Actuaries (SOA), formed in 1949, is one of the largest actuarial professional organizations in the world, dedicated to serving more than 28,000 actuarial members and the public in the United States, Canada and worldwide. In line with the SOA Vision Statement, actuaries act as business leaders who develop and use mathematical models to measure and manage risk in support of financial security for individuals, organizations and the public.

The SOA supports actuaries and advances knowledge through research and education. As part of its work, the SOA seeks to inform public policy development and public understanding through research. The SOA aspires to be a trusted source of objective, data-driven research and analysis with an actuarial perspective for its members, industry, policymakers and the public. This distinct perspective comes from the SOA as an association of actuaries, who have a rigorous formal education and direct experience as practitioners as they perform applied research. The SOA also welcomes the opportunity to partner with other organizations in our work where appropriate.

The SOA has a history of working with public policymakers and regulators in developing historical experience studies and projection techniques as well as individual reports on health care, retirement and other topics. The SOA's research is intended to aid the work of policymakers and regulators and follows certain core principles:

Objectivity: The SOA's research informs and provides analysis that can be relied upon by other individuals or organizations involved in public policy discussions. The SOA does not take advocacy positions or lobby specific policy proposals.

Quality: The SOA aspires to the highest ethical and quality standards in all of its research and analysis. Our research process is overseen by experienced actuaries and non-actuaries from a range of industry sectors and organizations. A rigorous peer-review process ensures the quality and integrity of our work.

Relevance: The SOA provides timely research on public policy issues. Our research advances actuarial knowledge while providing critical insights on key policy issues, and thereby provides value to stakeholders and decision makers.

Quantification: The SOA leverages the diverse skill sets of actuaries to provide research and findings that are driven by the best available data and methods. Actuaries use detailed modeling to analyze financial risk and provide distinct insight and quantification. Further, actuarial standards require transparency and the disclosure of the assumptions and analytic approach underlying the work.
