

Society of Actuaries Exam –  
General Insurance, Financial and  
Regulatory Environment – U.S.

Case Study  
Spring 2023

## Introduction and Recommendations

This case study presents information for R-Dan General Insurance Company (R-Dan), a U.S.-based general insurer (i.e., a property and casualty insurer) writing mainly homeowners and automobile insurance policies. R-Dan is owned by the holding company A-Eye Holdings. It is the only insurance company in A-Eye Holdings. The Spring 2023 case study is identical to the Fall 2022 case study except for the year labels increasing by one year.

You are encouraged to read this case study in conjunction with the recommended study materials. This will help you become familiar with the information that is provided in this case study and assist you in putting syllabus readings in context. The case study should be read critically, with the understanding that it is meant to represent a hypothetical organization that may not always use best practices.

Unless otherwise stated, all amounts in the exhibits are displayed in thousands of dollars (U.S. currency). For simplicity, all dollar amounts in the annual statement exhibits are rounded to the nearest \$100,000.

The exam will include access to a pdf file of the case study. You will not be allowed to bring your copy of this case study into the testing center.

The exam spreadsheet file will be preloaded with data from this case study.

## 1 Company Background

U.S.-based insurer R-Dan General Insurance Company (R-Dan) is domiciled in the state of Nebraska and is licensed to write general insurance in twenty states. It is a wholly owned subsidiary of A-Eye Holdings and is the only insurance company owned by A-Eye Holdings. R-Dan offers automobile, homeowners multi-peril and inland marine insurance products. R-Dan has a financial rating of “A” from A.M. Best and an NAIC RBC ratio over 600%.

The company does not use agents. It acquires business through direct marketing to both consumers and affinity groups. R-Dan focuses on personal lines although it does write a small amount of commercial automobile. Personal lines automobile currently represents approximately 70% of the total earned premium volume for the company, with homeowners coverage representing the bulk of the remaining 30%; other coverages represent less than 1% of premium. R-Dan is considering significant growth in its homeowners business over the next five years. It is also considering expansion of its commercial lines business.

## 2 Risk and Capital

As of year-end 2022, the Company had a surplus of \$209 million, a NAIC RBC ratio of over 600%, and a premium to surplus ratio of just under 3. Over the period from 2018 to 2021, the company produced positive net income each year and increased its surplus from \$179 million to \$209 million. During 2022, the company lost over \$16 million. It was able to maintain surplus at \$209 million by means of a significant injection of capital from A-Eye Holdings.

The Company purchases a minimal amount of reinsurance protection.

## 3 Products

R-Dan offers automobile, homeowners multi-peril and inland marine insurance products. Most of the Company’s business is for personal lines although there is some commercial lines business. It writes business directly using social media advertising campaigns to bring consumers to its internet sales site. It also runs affinity campaigns with various organizations to attract personal lines business.

R-Dan has been successful in attracting business using an aggressive pricing strategy combined with underwriting based on advanced analytics. It has been willing to sacrifice profitability for growth. Its parent, A-Eye Holdings, has been willing to fund this strategy to meet R-Dan’s growth targets.

R-Dan is domiciled in the state of Nebraska and is licensed to write general insurance in twenty states. It currently writes in only seven states: Illinois, Iowa, Michigan, Nebraska, Ohio, South Dakota and Wyoming. The Company categorizes these seven states into Core territory and non-Core territory. The Core territory consists of the smaller, mainly rural, states of Iowa, Nebraska, South Dakota, and Wyoming. The non-Core territory consists of the

## SOA GI-FREU Case Study – Spring 2023

larger, more urban, states of Illinois, Michigan, and Ohio. While the majority of R-Dan’s business is in the Core territory, it has focused its recent growth outside the Core territory.

R-Dan is planning to grow its commercial lines business over the next five years by targeting small business owners for their commercial automobile, commercial multi-peril and professional liability coverages.

The Company does not write any loss-sensitive or claims made policies.

### 4 Results

R-Dan’s underwriting results reflect the current strategy of sacrificing profitability for growth. Its loss ratios have been above that of the industry for a number of years. This past year resulted in the highest combined ratio the company has experienced over the past five years, 112%. While the company has produced a superior level of investment income, recently it has not been enough to offset the underwriting losses. If the company continues its current strategy, it will require further injections of capital from its parent, A-Eye Holdings.

The following table shows the Company’s direct premiums written over the past five years (amounts in \$ millions):

<b>LOB</b>	<b>2022</b>	<b>2021</b>	<b>2018</b>	<b>2017</b>	<b>2016</b>
Private passenger auto liability	243.8	226.1	218.9	212.6	207.1
Commercial auto liability	4.4	3.8	3.3	3.2	3.2
Automobile physical damage	179.9	159.7	150.9	150.6	148.3
Homeowners multiple peril	189.3	154.7	120.4	97.4	86.1
Special property	0.7	0.0	0.0	0.0	0.0
<b>Total</b>	<b>618.1</b>	<b>544.3</b>	<b>493.5</b>	<b>463.8</b>	<b>444.7</b>

### 5 Investments

None of R-Dan’s investments in fixed income securities or equities are with affiliated companies. Over 90% of the Company’s investments are in fixed income securities. At year-end, fixed income securities amounted to \$609.6 million. The following table summarizes the distribution of fixed income securities by NAIC Bond Class as of year-end 2022.

<b>NAIC Bond Class</b>	<b>\$ Amount Distribution</b>	<b># of Issuers</b>
Federal government bonds, guaranteed by U.S. government	40%	5
Class 1—Highest quality	30%	150*
Class 2—High quality	17%	100
Class 3—Medium quality	6%	60
Class 4—Low quality	4%	30
Class 5—Lower quality	2%	20
Class 6—In or near default	1%	15

\*Of the 150 issuers of Class 1 bonds, 30 represent U.S. government agencies.

SOA GI-FREU Case Study – Spring 2023

The remaining investments are made up from \$6.7 million in cash and other short-term investments, and \$28.4 million from admitted common stocks.

As of year-end 2022, R-Dan’s 10 largest assets by asset name (not including U.S. government backed assets) accounted for just over 5% of total invested assets (including U.S. government backed assets). The following table shows a summary of the 10 largest assets by asset name (amounts in \$000s):

<b>Asset Name</b>	<b>Class 2 Bond</b>	<b>Class 3 Bond</b>	<b>Class 4 Bond</b>	<b>Class 5 Bond</b>	<b>Common Stock</b>
A01	0	5,394	0	0	500
A02	3,471	0	0	0	1,000
A03	3,253	0	0	0	600
A04	0	2,685	0	0	750
A05	3,237	0	0	0	0
A06	0	0	0	0	3,000
A07	0	0	2,844	0	0
A08	2,827	0	0	0	100
A09	0	0	0	2,091	650
A10	2,258	0	0	0	220
Total	15,046	8,079	2,844	2,091	6,820

## 6 Rating Agency Review

R-Dan has a financial rating of “A” from A.M. Best and is scheduled for a rating agency review at which time R-Dan will outline its plans for growth over the next five years. The following table summarizes R-Dan’s plans for growth:

	Actual	Projected	Projected	Projected	Projected	Projected
	2022	2023	2024	2025	2026	2027
<b>Gross Premiums Written</b>						
Liability lines	248,200	279,200	293,200	303,500	314,100	325,100
Property lines	180,600	203,200	213,400	220,900	228,600	236,600
Property and liability combined lines	189,300	217,700	239,500	263,500	289,900	318,900
Total	618,100	700,100	746,100	787,900	832,600	880,600
<b>Net Premiums Written</b>						
Liability lines	243,900	274,400	288,100	298,200	308,600	319,400
Property lines	179,700	202,200	212,300	219,700	227,400	235,400
Property and liability combined lines	184,100	211,700	232,900	256,200	281,800	310,000
Total	607,700	688,300	733,300	774,100	817,800	864,800
<b>Income</b>						
Net underwriting gain (loss)	(72,500)	(30,000)	(10,000)	-	10,000	20,000
Net investment gain (loss)	33,000	35,000	40,000	42,000	45,000	49,000
Federal and foreign income taxes incurred	(20,300)	(5,000)	2,500	6,000	7,000	8,000
Net income	(16,500)	10,000	27,500	36,000	48,000	61,000
<b>Surplus</b>						
Capital paid-in by parent during year	10,000	10,000	-	-	-	-
Surplus as regards policyholders at year-end	209,400	229,400	256,900	292,900	340,900	401,900

This plan involves increasing its business in the non-Core territory and commercial lines over the next two years and then increasing rate level. A-Eye Holdings has committed to paying in another \$10 million in capital before the end of 2022 so that the plan can be achieved.

7.3 of Actuarial Opinion

**R-Dan General Insurance Company**  
**Statement of Actuarial Opinion**  
As of December 31, 2022

**IDENTIFICATION**

I, Sue Calvin, am a consultant with Vomisa Actuarial Consulting. I am a Member in good standing of the American Academy of Actuaries, meeting its qualification standards for signing statements of Actuarial Opinion regarding property and casualty insurance company Annual Statements. I was appointed by the Board of Directors of R-Dan General Insurance Company (the Company) on July 1, 2018 to render this Opinion with regard to loss and loss adjustment expense reserves.

**SCOPE**

I have examined the reserves listed in Exhibit A, as shown in the U.S. Statutory Annual Statement of the Company as prepared for filing with state regulatory officials, as of December 31, 2022. The items listed in Exhibit A, on which I am expressing an opinion, reflect disclosure items 8 through 13 in Exhibit B. The loss and loss adjustment expense reserves do not include any explicit risk margins.

In forming my opinion on the loss and loss adjustment expense reserves, I relied upon data prepared by E.J. Bailey, Chief Financial Officer for R-Dan General Insurance Company. I evaluated the data used directly in my analysis for reasonableness and consistency. I also reconciled the data to Schedule P – Part 1 of the Company’s Annual Statement as of December 31, 2022. My evaluation did not reveal any material deficiencies in the data provided to me.

I have examined the reserves listed in Exhibit A, as shown in the Annual Statement of the Company as prepared for filing with state regulatory officials, as of December 31, 2022, and reviewed information provided to me through February 16, 2023. The analysis underlying my opinion included the use of such actuarial assumptions and methods and such tests of calculations as I considered necessary and consistent with actuarial standards of practice.

My review was limited to the items included in Exhibit A and did not include any other annual statement items. My opinion on the reserves assumes that there are sufficient assets held by the Company, which are appropriate for meeting the expected cash flow requirements from the unpaid claim liabilities. I have not reviewed the Company’s held assets.

**OPINION**

In my opinion, the amounts shown in Exhibit A for the sum of items (1) and (2), the sum of items (3) and (4), and the sum of items (1), (2), (5) and (6):

- A. Meet the requirements of the insurance laws of the State of Nebraska.
- B. Are consistent with reserves computed in accordance with accepted actuarial standards and principles.
- C. Make a reasonable provision for all unpaid loss and loss adjustment expense obligations of the Company under the terms of its contracts and agreements.

## **RELEVANT COMMENTS**

### Risk of Material Adverse Deviation

For this Opinion, I evaluated materiality as the minimum of (1) 7.5% of statutory surplus, and (2) 5% of net loss and loss adjustment expense reserves, or \$14.5 million. Therefore, I consider the potential for adverse deviation of the Company's reserves for unpaid losses and loss adjustment expenses of \$14.5 million or greater to be material. It is my opinion that there exist significant risks associated with the Company's net loss and loss adjustment expenses that could result in material adverse deviation. These risks include uncertainty regarding the Company's growth in states outside of its Core territory, recent changes to claims reserving personnel and claims reserving procedures.

### Anticipated Salvage and Subrogation

The Company's reserves listed in Exhibit A are established net of anticipated salvage and subrogation.

### Accounting Standard and Discounting

The Company's reserves were recorded in accordance with Statutory Accounting Principles. The Company does not discount its reserves (as listed in Exhibit A) for the time value of money.

### Underwriting Pools and Associations

The Company noted that its participation in any pools or associations is not material.

### Reinsurance

Based on discussions with Company management and its description of the Company's ceded reinsurance:

- I am not aware of any reinsurance contract that either has been or should have been accounted for as retroactive reinsurance; and
- I am not aware of any reinsurance contract that either has been or should have been accounted for as financial reinsurance.
- Use of ceded reinsurance is minimal, resulting in an immaterial risk of reinsurance uncollectability relative to loss and loss adjustment expense reserves and surplus.
- The Company's ceded billed but uncollected balances are not material.

### IRIS Ratios

During the past year, the company reserves created an exceptional value for IRIS Test 12 Two-Year Reserve Development to Surplus. This was mainly due to an unusual level of development for accident year 2020 from the Private Passenger Automobile Liability line of business. This is likely due to a strengthening of reserves to account for unusual development patterns. This is likely due to expansion into states with development patterns considerably higher than those historically observed by the company.

## SOA GI-FREU Case Study – Spring 2023

### DISTRIBUTION AND USE

An actuarial report providing the technical support for this Statement of Actuarial Opinion has been provided to the Company. This report is to be retained by the Company for a period of seven years and is available for regulatory examination.

This Statement of Actuarial Opinion is provided for use by the various state departments of insurance for which the Company files its Annual Statement. The intended primary users of this document are state regulators. It should not be used or distributed for any other purpose.

## 7.4 Actuarial Opinion Summary

**R-Dan General Insurance Company**  
**Actuarial Opinion Summary**  
As of December 31, 2022

<i>Amounts in \$000s</i>		Net Reserves			Gross Reserves		
		Low	Point	High	Low	Point	High
A.	Actuary's range of estimates	282,200		349,300	305,900		378,600
B.	Actuary's point estimate		318,000			344,700	
C.	Company carried reserves		289,500			316,700	
D.	Difference between company carried and actuary's estimate	7,300	-28,500	-59,800	10,800	-28,000	-61,900

- E. The Company had one-year adverse development in excess of five percent of the prior year's surplus in at least three of the last five calendar years. I have determined that the adverse development experienced by the Company was due to a minor strengthening of reserves and the company's consistent setting of reserves at the low end of the reasonable range.

I have signed the Company's Statement of Actuarial Opinion on Feb. 18, 2023. These two documents are closely linked; the Actuarial Opinion Summary is an extension of the Statement of Actuarial Opinion. Therefore, all limitations, caveats, and reliances in the Statement of Actuarial Opinion should also be applied to the Actuarial Opinion Summary.

This Actuarial Opinion Summary was prepared solely for the Company for filing with regulatory agencies and is not intended for any other purpose. Furthermore, it is my understanding that, consistent with the Annual Statement Supplemental Filing Instructions, the information provided in this Actuarial Opinion Summary will be kept confidential by those regulatory agencies and will not be made available for public inspection, subject to applicable law.

## 7.5 Excerpts from the Actuarial Report

**R-Dan General Insurance Company**  
**Actuarial Report**

As of December 31, 2021

*Description of Appointed Actuary's relationship to the company*

I, Sue Calvin, am a consultant with Vomisa Actuarial Consulting. I am an independent consultant to the Company. I am a Member of the American Academy of Actuaries and fully qualified to sign statements of actuarial opinion regarding property and casualty insurance company Annual Statements. My role is to evaluate the reasonableness of the carried reserves. I do not explicitly advise management or the board of directors in the reserve setting process.

◇◇◇

A full copy of this report has been made available to the board of directors. A summary of the findings of my analysis will be presented to the board of directors on February 23, 2023.

◇◇◇

February 18, 2023

Sue Calvin, MAAA  
 Consultant  
 Vomisa Actuarial Consulting

*Exhibit comparing Appointed Actuary's conclusions to carried amounts in Annual Statement*

The following table reconciles the results of my analysis to the Annual Statement:

Analysis Segment <i>Amounts in \$000s</i>	Actuary Estimated	Actuarial Report Exhibit	Company Carried	Source <sup>1</sup> of Company Carried	Difference
Homeowners Multiple Peril	51,700	C	36,200	Sch.P Pt 1A	-15,500
Private Passenger Auto Liability	258,700	D	248,300	Sch.P Pt 1B	-10,400
Commercial Auto Liability	1,000	E	600	Sch.P Pt 1C	-400
All Other Lines	6,600	F + G	4,400	Total - above	-2,200
Total	318,000	A	289,500	Sch.P Pt 1	-28,500

All earned premiums, case reserves and paid loss and loss adjustment expense amounts used in my analysis reconcile to the corresponding amounts in Schedule P by line of business and year. Any differences are insignificant. Tables showing this Schedule P reconciliation are included in the Appendix of this report.

<sup>1</sup> Sch.P Pt = Annual Statement Schedule P Part

*Exhibit and discussion on change in Appointed Actuary's estimates*

The following table compares the results of my current analysis to the prior year's analysis:

	Change in actuarial estimate of net ultimate loss and DCC expenses (in 000s)										
	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	Total
<b>Homeowners Multiple Peril</b>											
Current estimate	129,800	95,000	78,600	74,700	61,100	49,200	53,300	32,500	31,200	19,500	
Prior estimate		94,800	78,100	74,500	61,000	49,200	53,300	32,500	31,200	19,600	
Change in estimate		200	500	200	100	-	-	-	-	(100)	900
<b>Private Passenger Auto Liability</b>											
Current estimate	209,700	191,700	192,100	188,500	183,200	160,300	153,100	146,100	130,400	130,300	
Prior estimate		187,000	191,000	187,800	182,700	159,400	152,900	146,000	130,500	130,300	
Change in estimate		4,700	1,100	700	500	900	200	100	(100)	-	8,100
<b>Commercial Auto Liability</b>											
Current estimate	800	200	300	400	800	1,000	900	900	7,600	5,900	
Prior estimate		400	300	500	900	1,000	900	1,000	7,600	5,900	
Change in estimate		(200)	-	(100)	(100)	-	-	(100)	-	-	(500)
<b>Total Auto Physical Damage</b>											
Current estimate	131,600	111,900	114,200	106,800	101,000	96,600	97,700	92,800	82,300	75,700	
Prior estimate		114,100	113,900	106,300	101,000	96,400	97,600	92,700	82,200	75,700	
Change in estimate		(2,200)	300	500	-	200	100	100	100	-	(900)

From the table above, I note that there has been adverse development over the past year for both Homeowners and Private Passenger Automobile Liability. The methodology used has remained constant. Continued development above historical averages has led to an increase in the selected development factors for all lines and an increase in the selected tail factor for Private Passenger Automobile Liability. This is the second year in a row showing adverse development. The adverse development is not from development on any large losses or catastrophic losses.

It is possible that case reserves have weakened over the past three years although the data is inconclusive. The changing development patterns may be due to the company's expansion into states outside of its Core territory for these lines of business. If the trends of the past two years regarding adverse development continue, the methodology may need to be revised to reflect the more recent patterns.

*Extended comments on risks and uncertainties*

For the Statement of Actuarial Opinion, I evaluated materiality as the minimum of (1) 7.5% of statutory surplus, and (2) 5% of net loss and loss adjustment expense reserves, or \$14.5 million. Therefore, I consider the potential for adverse deviation of the Company's reserves for unpaid losses and loss adjustment expenses of \$14.5 million or greater to be material. It is my opinion that there exist significant risks associated with the Company's net loss and loss adjustment expenses that could result in material adverse deviation. These risks include uncertainty regarding the Company's growth in states outside of its core territory, and recent changes to claims reserving personnel and claims reserving procedures.

Over the past five years, the Company's net written premium has grown by over 40% from \$424 million in 2018 to over \$607 million in 2022. Much of this growth is fuelled by growth in states

## SOA GI-FREU Case Study – Spring 2023

outside of its core territory. The Company's Core territory consists of the smaller, mostly rural states of Nebraska, Iowa, South Dakota and Wyoming. In 2018, less than 10% of the Company's net written premium was for business written outside the core territory states. By 2022, business outside the Core territory states had grown to over 30% of the Company's net written premium. States outside the Core territory are the larger, more urban states of Michigan, Illinois, and Ohio. It should be noted that Michigan is a no-fault state for automobile insurance. This rapid growth outside the core territory has required the hiring of new staff and increased the uncertainty in claims reserving especially considering the Company's challenge of reserving for Michigan no-fault claims in which it has little experience. As the volume of business grows outside the Core territory, the actuarial reserve analysis will be performed territorially for automobile liability to reduce heterogeneity of development patterns.

The Company does not have any issues with its reinsurance regarding collectibility. Its reinsurance program consists of excess of loss treaties for automobile liability, and catastrophe protection for homeowners and inland marine. Reinsurance protection provided to the Company is limited by its selection of a high attachment point for both the personal lines automobile liability excess treaty and the catastrophe coverage. Given the Company's significant growth in non-Core territories, it would be prudent to lower its attachment point and/or consider proportional reinsurance protection to reduce its risk through this period of growth. Furthermore, the company should ensure that the reinsurance limits are appropriate given its exposure to Michigan no-fault automobile medical claims. Also, consideration should be given to extending catastrophe protection to automobile physical damage.

I have reviewed the Company's exposure to asbestos and environmental claims. In my opinion, the chance of material liability is remote, since there have been no claims reported in the annual statement A&E Note, and the Company has never written commercial liability coverages on a primary, excess, or assumed basis.

---

### *Extended comments on unusual values for IRIS Ratios 11, 12, and/or 13*

During the past year, the company reserves created an exceptional value for IRIS Ratio 12 Two-Year Reserve Development to Surplus. This was mainly due to an unusual level of development for accident year 2020 from the Private Passenger Liability line of business. This is likely due to a strengthening of reserves to account for unusual development patterns and expansion into states with development patterns considerably higher than those historically observed by the company.

Over the past several years, the company has been reserving near the low end of my range of estimates. I have recommended that carried reserves be adjusted closer to my central estimate.

---

## 7.6 Comparison to Industry

The following table compares industry net incurred loss ratios to the Company’s net incurred loss ratios over the past three years by line of business. The table also shows industry results for Core territories and non-Core Territories as defined by the Company.<sup>2</sup> It is clear that Company loss ratios are significantly higher than those experienced by the industry over this time period even though the company writes a majority of its business in Core territories.

Note that the Company can be expected to write above industry loss ratios as its expense levels are below those of the industry. However, the difference in loss ratios exceeds the expense ratio difference. A main consideration for the higher loss ratios is that the Company is attempting to increase its market share in all states in which it writes business and is using lower prices to attract new business. It is also focusing much of its growth in the non-Core territories which experience higher loss ratios.

LOB	Industry Countrywide Loss Ratio						LOB	Company Loss Ratio			
	All Territories				Core Terr	non-Core		All Territories			
	2nd Prior	Prior	Current	3 yr Avg	3 yr Avg	3 yr Avg		2nd Prior	Prior	Current	3 yr Avg
